### English Wireless Speaker

Before operating the unit, please read this guide thoroughly and retain it for future reference.  
Please access the following URL and read the contents of the END USER LICENSE AGREEMENT.  
[https://rd1.sony.net/help/speaker/el21/h\\_zz/](https://rd1.sony.net/help/speaker/el21/h_zz/)

**CAUTION**  
To reduce the risk of fire or electric shock, do not expose this appliance to dripping or splashing, and do not place objects filled with liquids, such as vases, on the apparatus.

Do not expose the appliance to naked flame sources (for example, lighted candles).

Do not install the appliance in a confined space, such as a bookcase or built-in cabinet.

As the main plug is used to disconnect the unit from the mains, connect the unit to an easily accessible AC outlet. Should you notice an abnormality in the unit, disconnect the main plug from the AC outlet immediately.

The unit is not disconnected from the mains as long as it is connected to the AC outlet, even if the unit itself has been turned off.

Do not expose the batteries (battery pack or batteries installed) to excessive heat such as sunshine, fire or the like for a long time. Do not subject the batteries to extreme low temperature conditions that may result in overheating and thermal runaway. Do not dismantle, open or shred secondary cells or batteries. In the event of a leak or damage, do not touch or come into contact with the liquid or damaged parts. If contact has been made, wash the affected area with copious amounts of water, and seek medical advice. Secondary cells and batteries need to be charged before use. Always use the correct charger and refer to the manufacturer's instructions or equipment manual for proper charging instructions. After extended periods of storage, it may be necessary to charge and discharge the cells or batteries several times to obtain maximum performance. Dispose of properly.

**Do not place this product close to medical devices**

This product (including accessories) has magnet(s) which may interfere with pacemakers, programmable shunt valves for hydrocephalus treatment, or other medical devices. Do not place this product close to persons who use such medical devices. Consult your doctor before using this product if you use any such medical device.

This equipment has been tested and found to comply with the limits set out in the EMC regulation using a connection cable shorter than 3 meters.

Inserting the USB plug or AC plug while it is wet may cause a short circuit due to foreign matter or liquid (tap water, salt water, soft drinks, etc.) getting on the main unit or charging cable. This may cause malfunctions or abnormal overheating.

Never insert the USB plug or AC plug while the main unit or charging cable is wet.

### Precautions

• Completely disconnect the AC power cord (mains lead) from the AC outlet (mains) if it is not going to be used for an extended period of time. When unplugging the unit, always grip the plug. Never pull the cord itself.

**On placement**

• To eliminate the risk of malfunctions, avoid the following locations when placing or leaving this unit:  
- A place subject to high temperatures, such as under direct sunlight or lighting equipment, near a heat source, or in a sauna  
- Inside a vehicle with the windows closed (especially in summertime)  
- A place subject to excessive dust  
- A place subject to strong vibration

• Place the unit on a flat, level surface. When placed on a sloped surface, the unit may fall over or fall off the surface due to its own vibration, resulting in injuries, malfunctions, or performance degradation.

• Depending on the conditions where this unit is placed, it may fall over or fall off the surface. Do not leave any valuable items near the unit.

• This unit is not anti-magnetic. Keep objects susceptible to magnetism (recorded tapes, watches, cash cards and credit cards with magnetic coding, etc.) away from the unit. When you carry around the unit, keep this in mind as well.

**Others**

• Do not use this unit for a long time, the temperature of this unit may rise, but it is not a malfunction. Do not use or leave the unit in an extremely cold or hot environment (temperature outside the range of 5 °C – 35 °C). If the unit is used or left outside the above range, the unit may automatically stop to protect internal circuitry.

• At high temperature, the charging may stop or the volume may reduce to protect the battery.

• Even if you do not intend to use the unit for a long time, charge the battery to its full capacity once every 6 months to maintain its performance.

**On Copyrights**

• Use of the Made for Apple badge means that an accessory has been designed to connect specifically to the Apple product(s) identified by the badge, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

Please note that the use of this accessory with an Apple product may affect wireless performance.

• Other trademarks and trade names are those of their respective owners.

• ™ and ® marks are omitted in the documents.

### Notes on water resistant feature (Read before using the unit)

#### Water resistant performance of the unit

The unit, with the cap closed securely, has a water resistant specification of IPX4\* as specified in "Degree of protection against splashing water" of the IEC60529 "Ingress Protection Rating (IP Code)"\*. However, the unit is not completely waterproof. Do not drop the unit into hot water in a bathtub or purposely use it in water.

**Liquids that the water resistant performance specifications apply to**

Applicable	fresh water, tap water, pool water
Not applicable	liquids other than the above (soapy water, water with detergent or bath agents, shampoo, hot spring water, salt water, etc.)

\*1 IPX4 (Degree of protection against splashing water): Protected against water splashing from any direction.

\*2 The liquid and accessories and the connectors of this unit (AC IN/USB/AUDIO IN/MIC/GUITAR) are not water resistant. To reduce the risk of fires or electric shocks, do not expose the unit to water or droplets while using any connectors (AC IN/USB/AUDIO IN/MIC/GUITAR). Do not place a vase or any other liquid-filled container on the unit.

The water resistant performance of the unit is based on our measurements under the conditions herein described. Note that malfunctions as a result of water immersion caused by misuse by the customer are not covered by the warranty.

#### To avoid the deterioration of the water resistant performance

Check the following use the unit correctly.  
• The unit does not have a design that is resistant to water pressure. Do not put the unit in the water or directly under the water gushing out of the faucet to avoid a malfunction.

• Do not pour high-temperature water or blow hot air from a hair dryer or any other appliance on the unit directly. Also never use the unit in a place subject to high temperatures, such as in a sauna or near a heat source.

• Handle the cap with care. The cap plays a very important role in maintenance of the water resistant performance. When using the unit, make sure that the cap is closed completely. When closing the cap, be careful not to allow foreign objects inside. If the cap is not closed completely the water resistant performance may deteriorate and may cause a malfunction of the unit as a result of water entering the unit.

#### How to care for the unit when wet

Be sure to wipe off the moisture after using the unit. If the unit is left wet, it may be soiled by water stains, molds, or the like.

The unit may change when water enters the speaker section of the unit. This, however, does not indicate a malfunction.

Wipe off the moisture on its surface, and put the unit on a dry soft cloth to drain the collected water inside the unit. Then, dry the unit in an airy place until no moisture remains.

**Note**  
• Clean this unit with a soft cloth slightly moistened with a mild detergent solution. Do not use any type of abrasive pad, scouring powder, or solvent, such as thinner, benzine, or alcohol.

• Especially in cold regions, be sure to wipe off the moisture after using the unit. Leaving moisture on its surface may cause the unit to freeze and malfunction.

#### Specifications

##### Speaker

Speaker system 2-way, Bass reflex

Speaker unit (SRS-XP700)  
Bass: Woofer: Approx. 170 mm × 170 mm (2)  
Tweeter: Approx. 60 mm dia. (3), Front  
Tweeter: Approx. 50 mm dia. (1), Rear  
Woofe: Approx. 140 mm × 140 mm (2)  
Tweeter: Approx. 50 mm dia. (2)

(SRS-XP500)  
Bass: Woofer: Approx. 140 mm × 140 mm (2)  
Tweeter: Approx. 50 mm dia. (2)

BLUETOOTH

Communication system BLUETOOTH Specification version 5.0

Maximum communication range Line of sight\*1 approx. 30 m

Frequency band 2.4 GHz band (2.4000 GHz – 2.4835 GHz)

Modulation method FHSS (Freq Hopping Spread Spectrum)

Compatible BLUETOOTH profiles\*2 A2DP (Advanced Audio Distribution Profile)

AVRCP (Audio Video Remote Control Profile)

Supported codecs\*3 SBC (Subband Codec)

AAC (Advanced Audio Coding)

LDAC\*4

Transmission range (A2DP) 20 Hz - 20 000 Hz (Sampling frequency 44.1 kHz)

\*1 Actual range will vary depending on factors such as obstacles between devices, magnetic fields and other environmental factors.

\*2 The profiles listed below are supported by the unit.

\*3 AAC and LDAC are not supported.

\*4 LDAC is a digital audio coding technology developed by Sony that enables the transmission of High-Resolution (Hi-Res) Audio content, even over a BLUETOOTH connection.
