AMIRON 100

True Wireless Earphones

DESCRIPTION

AMIRON 100 is a set of wireless Bluetooth® earphones with a closed design which is worn in the ear.

For optimal fit and perfect sound, 5 pairs of ear tips in different sizes are included in the delivery.

Thanks to Bluetooth® 5.3 with multi-point transmission, several devices can be connected to AMIRON 100 at the same time with consistent audio quality.

The active noise cancellation (ANC) effectively eliminates noise and allows undisturbed listening pleasure with consistently high sound quality. If necessary, the transparency mode can be activated.

When charging, the earphones are put into the charging case and charged via the battery of the charging case via USB-C or a wireless charging pad. The total battery life is 35 hours. You can use the quick charge function within 15 minutes for 3 hours of usage.

By tapping the touch pad, a multitude of functions are available such as playback, volume adjustment, answering calls, changing between ANC and transparency mode and call up voice assistance.

With the free beyerdynamic app the user can customise music playback or the device control. A 5-band equalizer makes it possible to use different sound preferences. Software updates are also available via the app.
