

Bowers & Wilkins

800 Series
DIAMOND

801 D4

802 D4

803 D4

Welcome and thank you for choosing

Bowers & Wilkins. Our founder, John Bowers, believed that imaginative design, innovative engineering and advanced technology were keys that could unlock the enjoyment of audio in the home. His belief is one that we continue to share and inspires every product we design.

The 800 Series Diamond is the world's most advanced range of loudspeakers. Each model benefits from thoughtful installation, so we would suggest that you take some time to read this manual before you begin the installation process. **Continue to page 4 →**

Bienvenue et merci d'avoir choisi Bowers et

Wilkins. Lorsque John Bowers a créé sa société, il savait déjà qu'un design imaginatif, une conception innovante et une technologie avancée seraient les clés du plaisir de l'écoute de la musique à domicile. C'est cette philosophie qui, aujourd'hui, continue de nous inspirer pour la conception de chaque nouvel appareil.

La 800 Series Diamond est la gamme d'enceinte acoustique la plus avancée au monde. Chaque modèle bénéficiera d'une mise en œuvre soignée, aussi nous vous suggérons de prendre le temps de lire ce manuel avant d'en commencer l'installation. **Suite page 9 →**

Willkommen bei Bowers & Wilkins.

Der Firmengründer John Bowers war der Meinung, dass ein wunderschönes Design, eine innovative Konstruktion und ausgeklügelte Technologien die Schlüssel zu Audio-Entertainment der Extraklasse in Ihrem Zuhause sind. Wir teilen seine Meinung und jedes von uns entwickelte Produkt basiert darauf.

Die Modelle der 800 Serie Diamond gehören zu den besten Lautsprechern weltweit. Ihre Installation sollte gut durchdacht werden. Wir empfehlen daher, sich die Zeit zu nehmen und diese Bedienungsanleitung vor der Installation zu lesen. **Fortsetzung auf Seite 14 →**

Bienvenido a Bowers & Wilkins. Gracias por elegir

Bowers & Wilkins. John Bowers, nuestro fundador, estaba firmemente convencido de que el diseño imaginativo, la ingeniería innovadora y la tecnología avanzada eran las claves a la hora de llevar el disfrute del sonido a la intimidad del hogar. Una creencia que seguimos compartiendo y que inspira todos y cada uno de los productos que diseñamos.

La Serie Diamond 800 es la gama de cajas acústicas más avanzada del mundo. Cada uno de los modelos que la constituyen se beneficiará de una instalación a conciencia, por lo que le sugerimos que antes de llevarla a cabo se tome su tiempo para leer este manual.

Bem-vindo e obrigado por escolher a Bowers &

Wilkins. O nosso fundador, John Bowers, acreditava que um design criativo, engenharia inovadora e tecnologia avançada eram as chaves que poderiam abrir portas para se desfrutar de áudio em casa. A sua crença é algo que continuamos a partilhar e que inspira cada produto que concebemos.

A Série 800 Diamond é a gama mais avançada de colunas, a nível mundial. Cada modelo tira partido de uma instalação cuidadosa, pelo que recomendamos que leia este manual antes de iniciar o processo de instalação. **Continuação na página 24 →**

Benvenuti e grazie per aver scelto un prodotto

Bowers & Wilkins. Il nostro fondatore, John Bowers, era convinto che design attraente, capacità d'innovare e tecnologie all'avanguardia fossero fattori vincenti per la riproduzione audio domestica. Le sue idee sono ancor oggi condivise da noi tutti e fonte d'ispirazione per ogni nuovo modello che progettiamo.

I modelli della Serie 800 Diamond sono tra i più avanzati diffusori al mondo e meritano quindi di venir installati in maniera scrupolosa. Vi suggeriamo pertanto di leggere attentamente questo manuale prima di iniziare. **Continua a pagina 29 →**

Welkom en dank u voor het kiezen van Bowers

& Wilkins. Onze oprichter John Bowers, was ervan overtuigd dat een fantasievoll ontwerp, innovatieve techniek en moderne technologie de sleutels vormden tot muziekbeleving thuis. Het is deze overtuiging waar we nog steeds van uitgaan en die de inspiratie vormt voor elk product dat we ontwerpen.

De 800 Serie Diamond is 's werelds meest geavanceerde model luidsprekers. Elk model is voorzien van een slimme installatiemethode en daarom raden we u aan dat u de tijd neemt om deze handleiding te lezen voordat u aan het installeren begint. **Lees verder op pagina 34 →**

Καλώς ήρθατε και ευχαριστούμε που επιλέξατε την

Bowers & Wilkins. Ο ιδρυτής μας, John Bowers, πίστεψε ότι η ευφάνταστη σχεδίαση, η καινοτομία στην ανάπτυξη και η εξελιγμένη τεχνολογία θα ήταν τα κλειδιά που θα άνοιγαν νέους κόσμους απόλαυσης του όχου στο σπίτι. Αυτή την πεπτιστή του συνεχίζουμε να μοιραζόμαστε και αυτή εμπνέει κάθε προϊόν που σχεδιάζουμε.

Η 800 Series Diamond είναι η πιο εξελιγμένη σειρά ηχείων στον κόσμο. Κάθε μοντέλο επωφελείται από την προσεκτική εγκατάσταση, οπότε θα προτείνουμε να αφιερώσετε λίγο χρόνο στην ανάγνωση αυτού του εγχειρίδιου προτού ξεκινήσετε τη διαδικασία εγκατάστασης. **Συνέχεια στη σελίδα 39 →**

Добро пожаловать и благодарим вас за приобретение продукта компании Bowers & Wilkins.

Наш основатель, Джон Бауэрс, верил в то, что творческий подход в проектировании, новаторская конструкция и передовые технологии смогут открыть людям путь к подлинному звучанию в доме. Мы продолжаем разделять его веру, и она вдохновляет нас при проектировании всех новых продуктов.

Серия 800 Diamond – это самые совершенные в мире акустические системы. Каждая модель может получить преимущества от продуманной установки, поэтому мы рекомендуем вам уделить некоторое время на прочтение этого Руководства перед тем как начать процесс установки. **Продолжение на стр. 44 →**

Vítejte u Bowers & Wilkins. Děkujeme Vám, že jste si zvolili značku Bowers & Wilkins. Když John Bowers zakládal naši firmu věřil, že nápadité provedení, nováčkůvský přístup a pokročilé technologie jsou klíčem otevirajícím dveře kvalitní reprodukci. Touto filozofií se dodnes inspirujeme, kdykoli tvoříme nový produkt.

Reprosoustavy řady 800 Diamond jsou jedněmi z nejvíce sofistikovaných reprosoustav na světě. Pro každý z modelů je však důležitá jeho správná instalace. Dříve než začnete, věnujte tedy prosím trochu času přečtení tohoto manuálu. **Pokračujte na stranu 49 →**

Hoş geldiniz ve Bowers & Wilkins'ı seçtiğiniz için teşekkür ederiz. Kurucumuz John Bowers, yaratıcı tasarıminın, yenilikçi mühendisliğinin ve ileri teknolojinin, evde sesin keyfini çıkarmannı kilidini açacak anahtarlar olduğuna inanıyordu. O'nun inancının paylaşmayı sürdürmekteyiz ve bu inanç, tasarladığınız her ürüne ilham vermektedir.

800 Diamond serisi, dünyanın en gelişmiş hoparlörleri sınıfındandır. Her bir model, dikkatli kurulum gerektirmektedir, bu nedenle kurulum işlemine başlamadan önce bu kullanım kılavuzunu okumaya zaman ayırmazsınız öneririz. **Devamı Sayfa 64'te →**

Bowers & Wilkins製品をお買い上げいただき、ありがとうございます。B&Wの創業者であるJohn Bowersは、創意に富んだデザインと革新的な工業技術、そして先進技術が、家庭でもオーディオを充分に楽しむ鍵であると信じていました。現在でも彼の信念はB&Wで共有されており、この信念はB&Wが設計するすべての製品に命を吹き込んでいます。

800シリーズ・ダイヤモンドは世界最先進クラスのスピーカーです。慎重な据え付けを行うことによって各モデルの持ち味が発揮されます。設定する前にこのマニュアルをよく読んでください。**79ページに続く →**

Köszönjük, hogy a Bowers & Wilkins-t választotta. Amikor John Bowers megalapította a céltársaságot, célja az volt, hogy az ötletes dizájn, innovatív megoldások és fejlett technológia révén tökéletesítse az otthoni hangzásvilág élményét. Ez az elképzélés mai napig a vállalat mozgatórugója, amely minden termékünk tervezését meghatározza.

A 800 Diamond sorozat a világ legfejlettebb hangsugárzóból áll. Mindegyik modell beüzemelése nagy odafigyelést igényel, ezért javasoljuk, hogy szánjon egy kis időt ennek az útmutatónak az elolvasására.

Bowers & Wilkins 제품을 구매하여 주신데 대해 감사합니다

사 드립니다. Bowers & Wilkins의 창립자 John Bowers는 가정에서 오디오의 즐거움을 느끼게 하는 중요 요소는 창의력이 풍부한 디자인, 혁신적 엔지니어링과 고도의 기술이라고 확신하였습니다. 그의 신념은 현재도 Bowers & Wilkins에서 공유되고 있으며 Bowers & Wilkins가 설계하는 모든 제품에 생명을 불어 넣고 있습니다.

800 시리즈 다이아몬드는 성능이 매우 뛰어난 스피커로서 설치하는데 세심한 주의가 필요합니다. 사용하시기 전에 이 매뉴얼을 잘 읽어 보시기 바랍니다.

Witamy i dziękujemy za wybór produktu Bowers & Wilkins. John Bowers założył swoją firmę, ponieważ wierzył, że ciekawy wygląd, innowacyjna konstrukcja i zaawansowana technologia są kluczem do rozkoszowania się dźwiękiem w domowym zaciszu.

Seria 800 Diamond jest najbardziej zaawansowanym asortymentem głośników na świecie. Przemyślana instalacja pozwala na uzyskanie pełni możliwości każdego modelu serii, dlatego też sugerujemy abyście poświęcili Państwo chwilę na przeczytanie niniejszej instrukcji przed rozpoczęciem użytkowania. **Więcej na stronie 59 →**

歡迎並感謝你選購 Bowers & Wilkins 產品。我們的創辦人John Bowers先生相信充滿想像的設計、創新的工程和先進的技術是開啟家庭音響娛樂大門的重要元素。我們依然堅持著他的信念，並賦予我們所有產品設計靈感。

800 Diamond系列是世界上最先進的揚聲器系列。周詳的安裝可使揚聲器發揮最佳音效，因此我們建議在開始安裝過程前，請花一些時間閱讀本手冊。**第74頁(續) →**

1. Unpacking

Carton Contents

Each pair of speakers are supplied with:

- 2 Midrange grilles
- 4 Bass grilles
- 4 Terminal link wires
- 4 Stabilisers
- 4 Stabiliser caps
- 1 T45 stabiliser adjustment and midrange end cap removal wedge tool
- 1 Metal spike adjustment bar
- 1 Cleaning cloth

The 801 D4, 802 D4 and 803 D4 are very heavy and we strongly suggest that they are unpacked in the room in which they are to be used by two people working together. It is also a sensible precaution to remove jewellery to negate the risk of scratching the speakers' surface finish.

The table above illustrates the component parts that are packed with the 801 D4, 802 D4 and 803 D4. In the unlikely event that anything is missing please contact the retailer from whom you purchased the speakers.

The heavier bass/midrange grilles attach magnetically and are packed in a separate compartment to prevent movement in transit.

Note: Care must be taken when fitting or removing the magnetically attached grilles to avoid marking the product. The grilles will mark the speaker / stand plinth if dropped; you can mitigate against this by covering the plinth when fitting or removing the grilles.

Tweeter diaphragms are very delicate and easily damaged. In the 800 Series Diamond we include a steel grille mesh that can protect the tweeter from many forms of damage. However, you should still exercise care when handling and cleaning your loudspeakers.

Environmental Information

This product complies with international directives, including but not limited to:

- i. the **Restriction of Hazardous Substances** (RoHS) in electrical and electronic equipment,
- ii. the **Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)**
- iii. the **disposal of Waste Electrical and Electronic Equipment (WEEE)**.

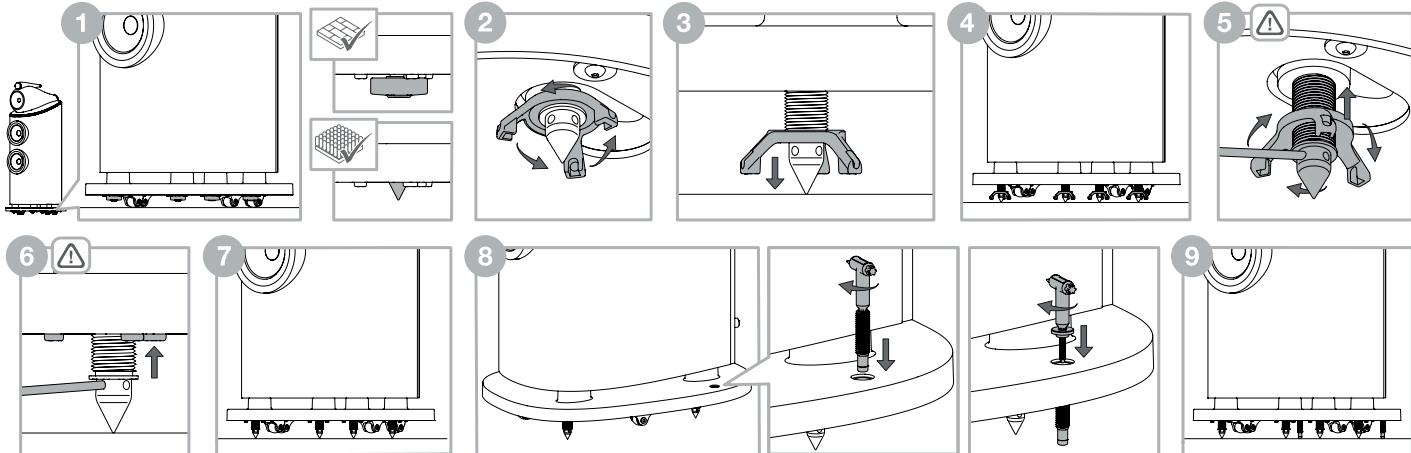

Consult your local waste disposal authority for guidance on how properly to recycle or dispose of this product.

The tweeter assembly on this 800 Series Diamond loudspeaker is a decoupled component that is mechanically isolated from the main part of the cabinet. As such, it may appear to be loose when the product is first removed from its packaging. This is not a fault, it is an inherent feature of the design and ensures optimum performance from your speaker.

If the tweeter assembly has moved during transit and requires adjustment, the assembly can be moved slightly forwards and backwards to ensure that the rear of the tweeter body is aligned with the rear of the speaker cabinet. The tweeter assembly can also be rotated slightly to ensure that the Bowers & Wilkins logo is vertically orientated. Do not force the tweeter into any position beyond the soft end-stops when making these adjustments.

Note: Care must be taken to not damage the decoupling assembly when making these adjustments - please seek assistance from your dealer if you are in any doubt about adjusting the tweeter assembly.

2. Positioning

Speaker Installation

801 D4, 802 D4 and 803 D4 are intended to be floor mounted only and are supplied on wheels to aid with positioning. It is important to ensure that they stand firmly on the floor using the spike feet supplied whenever possible.

Important Safety Notice

Sharp spikes, do not touch.

Note: If you are installing the product on very thick carpet such that the wheels prevent the speaker from resting solely on the spikes, you may wish to remove the wheels from the bottom of the plinth, using a 5mm hex (Allen) key. Due to the weight of the speakers, removal of the wheels should only be undertaken by two people – one to tilt the speaker sideways and hold it while the other removes the wheels. We recommend that a suitable wedge or block is used to prevent the loudspeaker accidentally falling to the floor whilst removing or refitting the wheels.

Once the speakers are in the correct position the spikes, inbuilt in the plinth, can be released. Placing your fingers in the gap between the plinth and the floor locate the four spike cups. If your speaker is positioned on a hard floor leave the spike cups in place to protect the flooring. If your speaker is on carpet remove the four spike cups, which are held magnetically, and retain them for future use. This will reveal the spike ready for it to be lowered into position.

Directly above each spike/spike cup you will feel a three pronged locking nut. Using your fingers, spin the locking nut, as directed above in step 2, to lower the spike/spike cup towards the floor. If the locking nut is too tight to turn, insert the supplied metal bar into the hole at the end of one of the prongs and turn; releasing the locking nut (see above illustration).

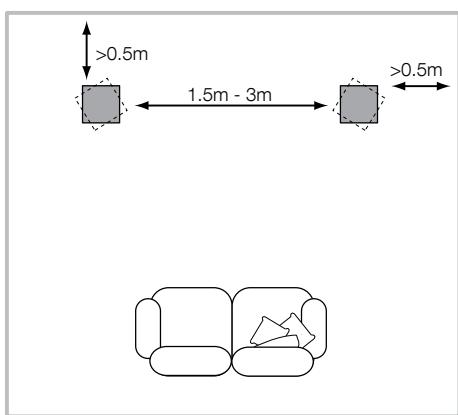

As the spike/spike cup meets the floor continue to turn the locking nut lifting the speaker off its wheels. Repeat this process with all four spikes/spike cups and adjust the height to ensure the speaker rests firmly without rocking.

To lock the spikes/spike cups in place insert the metal bar into one of the four holes in the spikes. Using the metal bar to stop the spike turning, rotate the locking nut, as directed above in step 5. Once the locking nut is released, remove the metal bar and continue to spin the locking nut returning it to its locked position in the plinth. To ensure the locking nut is tightly locked in place reinsert the metal bar into one of the four holes on the spike. With the metal bar holding the spike in position, use your fingers to turn the locking nut until it can no longer rotate. Repeat this for each spike.

Once the spikes are locked in position, the stabilisers should be fitted to minimise the risk of the loudspeaker being accidentally knocked over. The stabiliser should be threaded through the plinth and lowered into position by using the T45 tool to turn the stabiliser clockwise until the rubber tip rests on the floor.

The stabiliser should not be excessively tightened in order to avoid the spikes being unweighted, which would reduce stability and impair performance. Once the stabilisers are lowered into position the caps can be threaded into the top of the stabiliser and gently tightened with the T45 tool until they rest in the recess in the plinth.

If the speaker needs to be repositioned the stabiliser caps must be removed, the stabilisers raised and the spikes returned back into the plinth before the product is moved. To do this use the T45 tool to remove the stabiliser caps by turning anticlockwise, then use the T45 tool to raise the stabilisers by turning anticlockwise. Once the stabilisers are raised, insert the metal bar into one of the four holes in the spike, with the metal bar holding the spike in position, use your fingers to turn the locking nut, as directed above in step 2, releasing it. Then continue to spin the locking nut until it can no longer rotate; this will ensure the locking nut and spike are engaged. Now turn the locking nut, as directed above in step 3, and the spike will start ascending back into the plinth. Once the spike has been returned to the plinth replace the spike cup (if removed) and the speaker can now be repositioned.

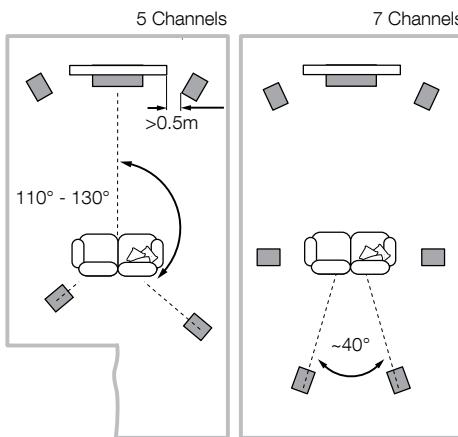

Speaker Positioning

In either stereo or home theatre installations, try to ensure that the immediate surroundings of each speaker are similar in acoustic character. For example, if one speaker is adjacent to bare walls while the other is adjacent to soft furnishings and curtains, both the overall sound quality and the stereo image are likely to be compromised.

Conventional Stereo Systems

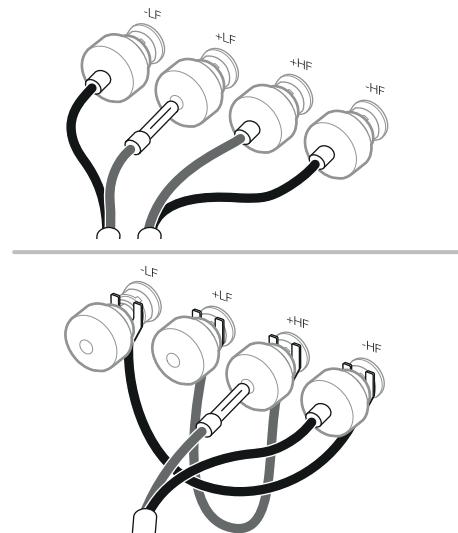

To begin with, the speakers should be positioned between 1.5m and 3m apart at two corners of an equilateral triangle completed by the listening area at the third corner. The speakers should be placed at least 0.5m away from the back and any side walls (as per the illustration above).

Home Theatre Systems

If the speakers are to be used for the front channels in a home theatre system, they should be placed closer together than for 2-channel audio, because the surround channels tend to widen the image. Positioning the speakers within approximately 0.5m of the sides of the screen will also help keep the sound image in scale with the visual image. As with conventional stereo positioning, the speakers should ideally be at least 0.5m away from any side walls.

3. Connecting

Important Safety Notice

All connections should be made with the audio equipment switched off. When using audio equipment in normal operation, touching uninsulated speaker terminals or wiring may result in an unpleasant sensation.

The 801 D4, 802 D4 and 803 D4 speaker terminals accept a variety of cable terminations: 4mm banana plugs, 6mm and 8mm (1/4 in and 5/16 in) spades, or bare wires up to 4mm (5/32 in) diameter.

Important Safety Notice

In certain countries, notably those in Europe, the use of 4mm banana plugs is considered a potential safety hazard, because they may be inserted into the holes of unshuttered mains supply sockets. In order to comply with European CENELEC safety regulations, the 4mm holes in the ends of the terminals are blocked by plastic pins. If you are using the products in any country where these conditions apply, you should ensure that any banana plugs cannot be used in an unsafe manner by children or other uninformed persons. The plastic pins can be removed if you wish to use banana plugs.

Ask your dealer for advice when selecting speaker cable. Keep its total impedance below the maximum recommended in the speaker specification and use a low inductance cable to avoid attenuation of high frequencies.

Technical Information

Technical features

Diamond tweeter
Solid Body Tweeter-on-Top
Continuum™ cone FST™ midrange
Anti-Resonance plug
Biomimetic Suspension
Turbine Head
Matrix™
Aerofoil™ Profile bass cones
Flowport™

Description

3-way vented-box system

Drive units

1x ø25mm (1in) Diamond Dome high-frequency
1x ø150mm (6in) Continuum™ cone FST™ midrange
2x ø250mm (10in) Aerofoil™ Profile bass

Frequency range

-6dB 13Hz - 35kHz

Frequency response (+/-3dB from reference axis)

15Hz - 28kHz ±3dB

Sensitivity

(on axis at 2.83Vrms at 1m)

90dB

Harmonic distortion

2nd and 3rd harmonics (90dB, 1m on axis)
<1% 30Hz – 20kHz
<0.3% 100Hz – 20kHz

Nominal impedance

8Ω (minimum 3.0Ω)

Recommended amplifier power

50W - 1,000W into 8Ω on unclipped programme

Max. recommended cable impedance

0.1Ω

Dimensions

Height: 1221mm (48.1in)
Width: 451mm (17.8in)
Depth: 600mm (23.6in)

Net weight

100.6kg (221.8lbs)

Finishes

Cabinet: California Burl Gloss
Midnight Blue Metallic

Grille: Black
